

## AMATEUR RADIO

TS-940S ANTENNA TUNER RELAYS

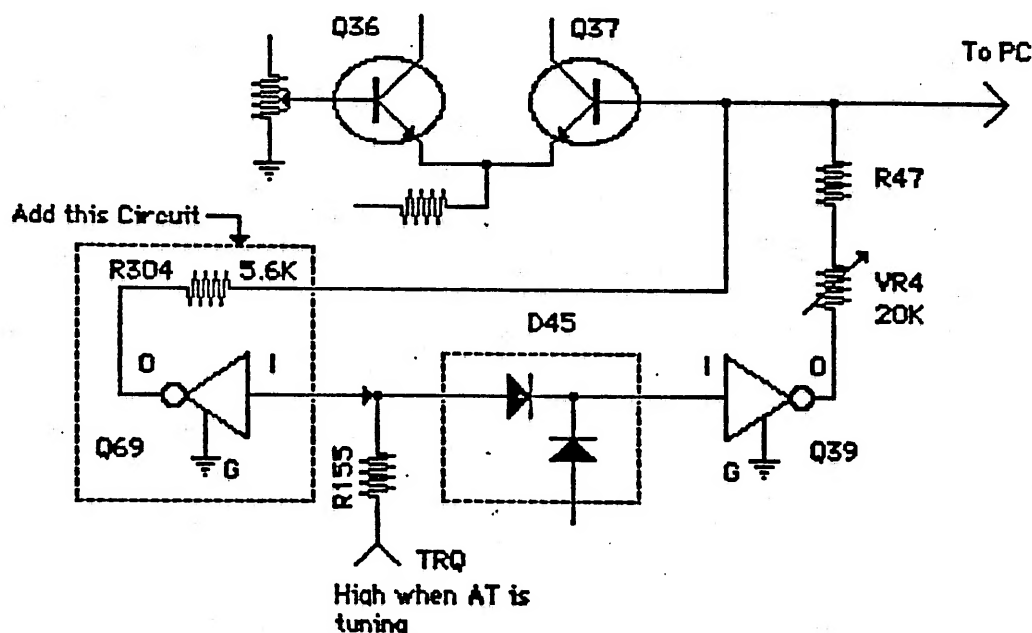

DATE \_\_\_\_\_

4-4-86

## Parts Required

R304: 5.6K ohm 1/6 W Resistor.....RD14BB2C562J

1. Add the circuit as shown below.
2. After the circuit has been installed adjust VR4 for a 10-15 watt output when the antenna tuner operates.

\* Mounted on foil side.

Diagram illustrating the rear view of the instrument panel assembly. Key components and labels include:

- PC2**, **PC**, **PCO**, **7B**, **-12**: Labels for components at the top of the assembly.
- (11)**: A rectangular component with a circular feature.
- R 304**: A curved component with a circular feature.
- C29**: A component with a circular feature.
- VR4**: A component with a circular feature.
- Q69**: A component with a circular feature.
- Q39**: A component with a circular feature.
- (8)**: A circular component.
- (9)**: A rectangular component.
- JP34** and **JP33**: Labels for components at the bottom right.
- JP4**: A label for a component at the bottom left.
